

**PRIMEFLEX**  
Cluster-in-a-box  
- your fast track  
to continuous  
operation

## FUJITSU Integrated System PRIMEFLEX Cluster-in-a-box based on PRIMERGY BX400 and PRIMERGY CX420

Maintaining the continuity of your services is fundamental to staying in business. Your IT supports and drives your business. It enables you to comply with regulations, improves your business processes and allows you to respond faster to new demands. Extended downtime would cause a direct and measurable impact on your business, as well as that of your partners and suppliers. This clearly leads to the need of a high available IT. But building such IT environments is still a complex task. Servers, storage, network and software have to be combined in the right configuration and installation. Instead of inventing the wheel again why not benefit from the knowledge gained in many similar projects? We understand the importance of keeping IT operations running and the need for a simple way to setup the appropriate IT environment.

### FUJITSU Integrated System PRIMEFLEX Cluster-in-a-box

PRIMEFLEX Cluster-in-a-box offers a well-balanced combination of server, storage, and networking components in one compact enclosure. With PRIMEFLEX Cluster-in-a-box, customers receive a "small and entire configuration" including Microsoft Windows Server 2012 pre-installed and pre-configured as a high availability cluster. Two server nodes, shared storage, integrated network and redundant power supplies are pre-packaged and pre-connected within a single box. PRIMEFLEX Cluster-in-a-box is perfectly suited for organizations with experience in administration of Microsoft Windows Server. Just turn it on, spend some minutes with our configuration wizard and you are ready to work. Designed for mid-market organizations and branch offices, PRIMEFLEX Cluster-in-a-box offers continuous availability at low costs to protect important data and business-critical services.

### Your advantages

- Continuous business operations almost without downtimes thanks to integrated availability mechanisms with failover clustering and redundant hardware components
- Easy to buy - single order code (SKU) or simplified configuration
- The pre-configured and pre-installed solutions are ready to use within some minutes
- No implementation risk because of thoroughly pre-tested configurations
- Optionally all benefits of server virtualization can be leveraged

### Our offer

**FUJITSU Server PRIMERGY BX400 and CX420 offer a stable, future-proof basis for your highly available infrastructure:**

- Pre-configured Fujitsu PRIMERGY servers with suitable disk capacity and appropriate I/O connectivity
- Pre-installed Microsoft Windows Server 2012 R2 Standard or Datacenter as a high availability cluster
- Configurable solutions available to fit multilevel needs
