Safeguarding Business Continuity on Critical SAP HANA Systems

Ongoing collaboration by Fujitsu, NetApp, and SAP has produced synergies among the companies' offerings that combine as groundbreaking infrastructure solutions for business-critical and mission-critical SAP HANA implementations. Businesses of all types and sizes stand to benefit with cost-effective, reliable, powerful mechanisms that drive insight and profitability.

Contents	
Introduction	2
1 A Growing Reliance on Critical Systems	2
2 Design Considerations for Business Continuity	3
3 Topologies for Resilient SAP HANA Implementations	3
3.1 High-Availability Topologies	3
3.2 Disaster Recovery Topologies	4
4 Hardware, Software, and Services for SAP HANA Business Continuity	5
