

# Fujitsu Server PRIMERGY Systems

## Servers that transform your IT into a competitive advantage

The fundamental changes in today's world are affecting our everyday lives, transforming everything from consumer behavior to the way we communicate. Everything around us, including ourselves, is linked and information is becoming a more and more valuable asset. This hyperconnectivity affects several facts in our environments with a major focus on ICT as the main driver of how information is exchanged and processed. To be able to respond to the challenges we are faced with, FUJITSU offers one of the broadest portfolios of servers on the market.

FUJITSU Servers PRIMERGY provide your company with the most powerful and flexible data center solutions on the market for companies of all sizes, across all industries and for any type of workload. This includes expandable PRIMERGY tower servers for remote and branch offices, rack-mount servers with leading efficiency and performance, compact and scalable blade systems, as well as density-optimised cloud server infrastructures. They impress due to their business-proven quality and a wide range of innovations, the highest levels of efficiency that cut operational cost and complexity, and more agility in daily operations in order to turn IT speed into a business advantage.

shaping tomorrow with you
